

Coffee with Counselors

Study Skills

Facts about Studying

- When multitasking, it typically takes the brain twice as long to complete an assignment or task, and your error rate goes up by about 50%.
- Learning that is spread out over time drastically increases knowledge retention
- Active recall is better than rereading. Close the book and recite everything you can remember up to that point.

More Facts About Studying

- Students who tested themselves with a practice test after learning the material retained 50% more of the information a week later than their peers who did not take a practice test.
- “Quick learners” make connections between ideas instead of just memorizing
- Students have better memory and recall abilities when they learn new information and then have to teach it to someone else

What is the best way to study?

- There is no one right way to study!
- Most people are more successful when they use a combination of different strategies
- Everyone is different which means everyone studies differently but there are some key strategies that have been shown to work for a wide variety of people

Study Techniques

- Make flashcards
- Rewrite your notes
- Complete or make your own study guide
- Teach the material to someone else
- Review your notes every night
- Connect your learning
- Practice concepts
- Don't just memorize, analyze
- Use acronyms or mnemonics

Flash Cards

- Will help you remember concepts faster
- Portable!
- Good for remembering definitions and key ideas

Rewrite your notes

- Easier to remember concepts when you write them down
- Forces you to reread your notes
- Good for concept heavy subjects

Complete or Make a Study Guide

- Writing things down makes it easier to remember
- Makes you focus on what is really important
- Good for all subjects that you need to study for

MIDTERM STUDY GUIDE

Chapter 1: Introduction to Data

WHAT IS DATA?

- **data**: collections of numbers, measurements, or any type of observation that someone records ("the building blocks of statistics")
 - **Examples of Data Collector**
 - election polls
 - surveys
 - Google analytics (browser history)
 - smartphone apps
 - sales transactions
 - hospital & school records
 - sports
 - Twitter / Facebook posts
 - satellites
- **variable**: a characteristic, number, or quantity of a unit being observed that can be measured or counted (a data item)
 - **Types of Variables:**
 - **numerical**: the values of the variable are numbers (ex. weight, height, temperature, GPA)
 - **categorical**: categories or classifications (ex. eye color, year in school, class subject)
 - **indicator variables**: just indicate which observation we are looking at (ex. full name, jersey number, student ID)
 - **observation**: data from an individual study subject or sampled unit

POPULATIONS AND SAMPLES

- **population**: collection of observations of interest
 - very large → nearly impossible to obtain measurements from
- **sample**: portion of the population of interest
 - usually taken to measure a characteristic about a population
 - size of sample (usually denoted by n)

ORGANIZING AND REPORTING CATEGORICAL DATA

- **two-way table (a.k.a. frequency table)**: displays the counts of 2 categorical variables

Teach the Material to Someone Else

- Tests your knowledge to see if you really know the material
- Need to not only know the answer but explain it
- Great for all sorts of subjects

Review your notes every night

- You are much more likely to remember information if you study it a little bit each night
- Eliminates the need to cram for tests
- You should use this for all subjects!

Connect Your Learning

- It is easier to remember information if you can attach some meaning towards it
- For example connecting vocabulary words to your personal life
- Great for all subjects

Practice Concepts

- The best way to get better at something is to practice!
- The more comfortable you are with material the easier it will be to remember it
- Great technique for math

Name : _____ Score : _____
Teacher : _____ Date : _____

$$\begin{array}{r} 95 \\ + 57 \\ \hline \end{array}$$
$$\begin{array}{r} 20 \\ + 28 \\ \hline \end{array}$$
$$\begin{array}{r} 82 \\ + 12 \\ \hline \end{array}$$
$$\begin{array}{r} 91 \\ + 94 \\ \hline \end{array}$$
$$\begin{array}{r} 11 \\ + 53 \\ \hline \end{array}$$
$$\begin{array}{r} 88 \\ + 60 \\ \hline \end{array}$$

$$\begin{array}{r} 98 \\ - 13 \\ \hline \end{array}$$
$$\begin{array}{r} 93 \\ - 20 \\ \hline \end{array}$$
$$\begin{array}{r} 68 \\ - 64 \\ \hline \end{array}$$
$$\begin{array}{r} 26 \\ - 24 \\ \hline \end{array}$$
$$\begin{array}{r} 83 \\ - 60 \\ \hline \end{array}$$
$$\begin{array}{r} 60 \\ - 32 \\ \hline \end{array}$$

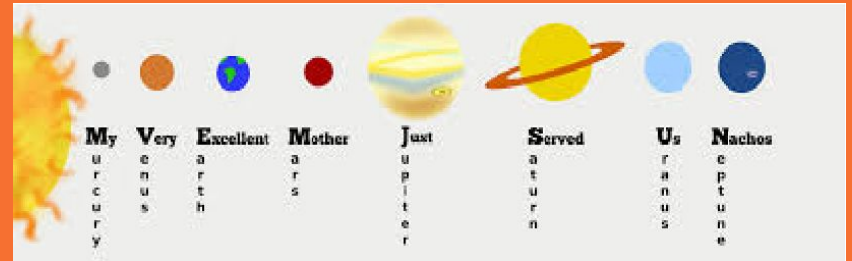

$$\begin{array}{r} 24 \\ \times 76 \\ \hline \end{array}$$
$$\begin{array}{r} 57 \\ \times 65 \\ \hline \end{array}$$
$$\begin{array}{r} 83 \\ \times 16 \\ \hline \end{array}$$
$$\begin{array}{r} 39 \\ \times 38 \\ \hline \end{array}$$
$$\begin{array}{r} 11 \\ \times 46 \\ \hline \end{array}$$
$$\begin{array}{r} 87 \\ \times 39 \\ \hline \end{array}$$

$$10 \overline{)85}$$
$$10 \overline{)81}$$
$$11 \overline{)63}$$
$$18 \overline{)56}$$
$$18 \overline{)44}$$
$$26 \overline{)97}$$

Use acronyms or mnemonics

- If you have a concept that you can't attach meaning too or analyze make up an acronym or mnemonic device to help you remember
- PEMDAS, My Very Educated Mother Just Served Us Noodles
- Use these to remember little formulas and small bits of information

Don't just memorize, analyze

- When you memorize words or definitions you aren't really learning
- Ask yourself why? When studying, why do I need to use this equation to solve for x ? Why did this battle start?
- Use this for all your learning

Take Into Account VARK learning styles

Visual- use color and color coding. Rewrite notes with different colored pens, highlight with different color highlighters, use colored index cards or note cards, color a diagram, etc.

Auditory- read notes out loud to self, discuss the concept with a classmate or adult, listen to a lecture about the topic again, or rewatch a video if that's an option

Take Into Account VARK Learning Styles

Reading/Writing- re read notes, read a story about the topic to make connections, read flashcards, write a new study guide, “be a teacher” and write the test/quiz, leave it for an hour then take the test/quiz you created

Kinesthetic- create a matching game with index cards (think words on one set, definitions on the other; names, dates, places for history and match them and move them, countries and capitals or leaders, concept and connection) where you can physically move and manipulate the information; walk/pace while looking at notes use
